U.S. EXPORT SALES

- Outstanding Export Sales
(Unshipped Balances)
On JUNE 13, 1976
- Export shipments in
Current Marketing Year
- Daily Sales reported
JUNE 14 — 22, 1976

-- As Reported by Exporters

Outstanding export sales as reported by private exporters and compiled with other data in this release give a snapshot view of the current contracting scene. At any given time in the course of a marketing year outstanding sales do not bear a consistent relationship to eventual export shipments. A meaningful export projection is not obtainable by the simple device of adding outstanding sales to exports to date. The latter data, alone, may provide a more reliable measure of current export activity than may be derived from a year-to-year comparison of outstanding sales.

EXPORT SALES REPORT

Comments on release of June 24, 1976 (based on reports from exporters for the week ending June 13, unless otherwise noted):

Wheat: The apparent export commitment (cumulative exports plus outstanding sales) for 1976/77 (year beginning June 1) advanced by 165,300 metric tons (MT), bringing this year's total commitment to 6.3 million MT. Commitments to Latin American destinations increased by 142,400 MT, largely reflecting new sales to Chile, Colombia, and Peru. Some of the other significant increases in commitments were to Japan, 42,100 MT, and the European Community (EC), 25,500 MT. These increases were partially offset by decreases in wheat commitments to unknown destinations of 78,200 MT.

Feedgrains: The apparent export commitment for corn for 1975/76 (year ending September 30) advanced by 619,300 MT, of which 60,700 MT were to the USSR (these reflect transfers from optional origin rather than new purchases by USSR authorities). Corn commitments for the year now total 39.8 million MT, compared with 29.5 million MT for the corresponding period a year ago. Some of the significant increases in corn commitments were to the EC, 229,100 MT; Spain, 82,000 MT; and Egypt, 71,800 MT. Total corn commitments for the year to the EC and Spain now stand at 8.6 million MT and 2.2 million MT, respectively. New sales of corn to Iran of 47,100 MT have pushed the total commitment for the year to 95,300 MT. At this time a year ago there were no corn commitments reported for Iran. Grain sorghum commitments for 1975/76 (year ending September 30) advanced by 32,100 MT, bringing the total commitment for the year to 5.0 million MT, about 400,000 MT below total commitments for the same period a year ago. Advances in sorghum commitments to Israel accounted for almost all of this week's increase.

Outstanding sales of corn for 1976/77 shipment (year beginning Oct. 1) increased by 617,400 MT, bringing the total for the year to 5.2 million MT compared with 2.6 million MT for the corresponding period last year. Sales to Japan accounted for over one-half of this week's increase.

Soybeans: The apparent export commitment for 1975/76 increased 178,400 MT, primarily reflecting larger commitments to Japan, the EC, Romania, Taiwan, and Israel. Commitments to unknown destinations declined 24,100 MT. Exports during the week totaled 514,700 MT, the largest volume shipped this season. Major takers included the EC (261,700 MT), Japan (73,600 MT), Israel (36,100 MT), Taiwan (26,400 MT), and Romania (21,300 MT).

Soybean Oilcake and Meal: The apparent export commitment for 1975/76 increased 94,600 MT, primarily reflecting larger commitments to the Netherlands, France, Canada, Japan, and Poland. Commitments to unknown destinations decreased 13,300 MT.

Exports during the week totaled 124,200 MT, primarily to France (30,900 MT), the Netherlands (19,000 MT), Venezuela (18,500 MT), West Germany (13,900 MT), Poland (13,000 MT), and Iran (10,000 MT).

Cotton: U.S. and foreign cotton prices continued to rise. This reflects concern that cold, rainy weather in the U.S. Delta and Southeast during May and earthquakes and torrential rains in the USSR during April and May might have caused damage to the current crop. Given the tight supply situation, the market is sensitive to news of adversities which would affect the size of the 1976/77 crops. In most other countries, weather conditions generally have been good and preliminary indications are that plantings in Central America during June-August and in the Southern Hemisphere during September-November will be increased. Larger crops in these countries would help to alleviate the tight supply situation during late 1976/77.

The U.S. net export commitment increased 164,000 running bales (RB), 31,000 RB for shipment during the current year and 133,000 RB for shipment in 1976/77. Japan, the Republic of Korea, Hong Kong, and Portugal were the largest buyers.

WHEAT EXPORTS IN REVIEW

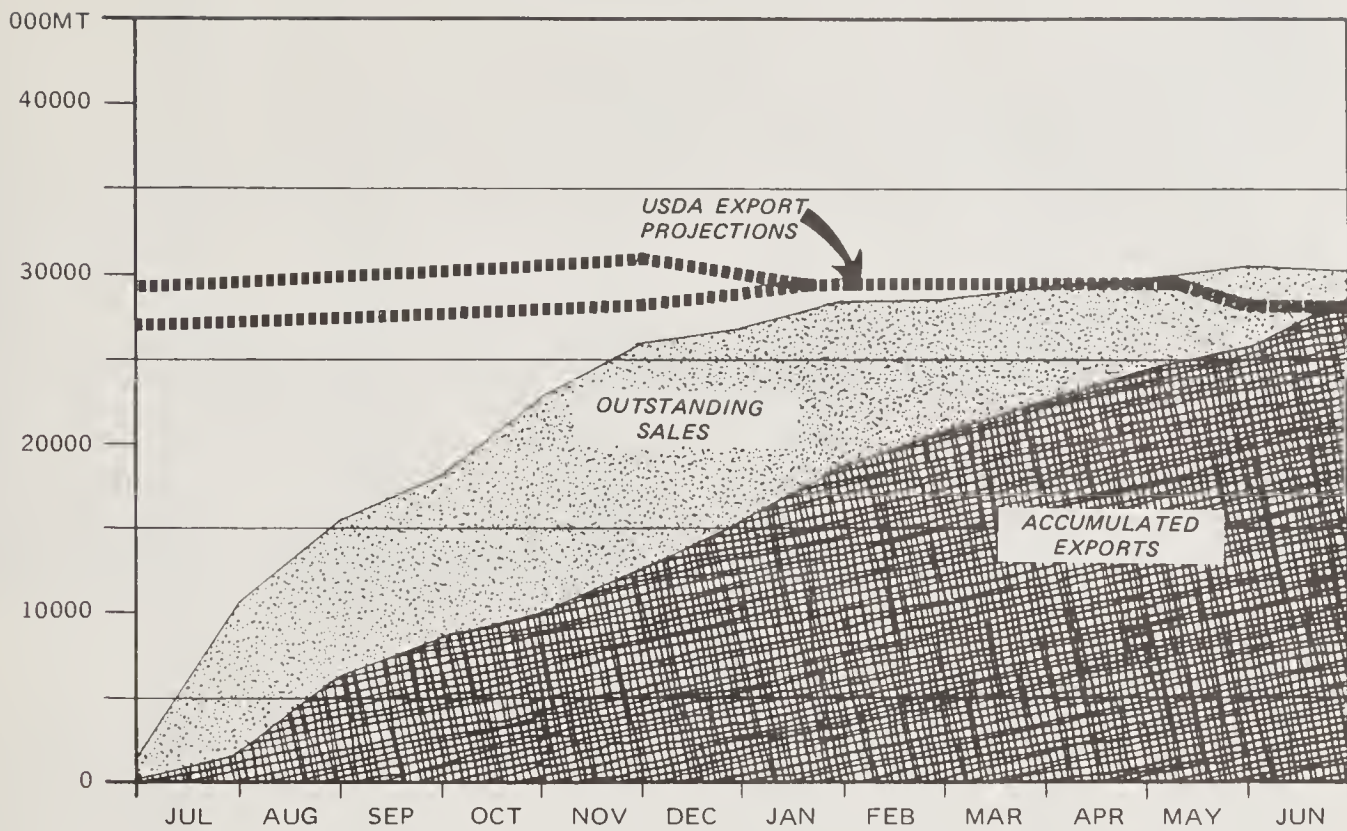

Exports of U.S. wheat for the 11 months of M.Y. 1975/76--July to end of May--were 29.4 million metric tons, up from the 26.4 million metric tons of the previous year, an increase of 11 percent. Significant increases were recorded for the USSR, Western Hemisphere and East Europe with lesser increases shown for the European Community, Africa, Japan, Taiwan and India. The reduced grain harvest in the USSR and East Europe placed reliance on stepped-up imports of wheat from the United States. Almost 4 million metric tons were exported to the USSR, along with 1.6 million metric tons to East Europe--up from 144 thousand tons the previous year. The major exports to this region went to the Democratic People's Republic of Germany and Poland. The Western Hemisphere had the second largest increase with Brazil, the largest, followed by Peru and Chile.

Only three regions showed declines in shipments of U.S. wheat from last year: the People's Republic of China, where good crops and long-term wheat contracts with Australia and Canada sharply reduced their demand for U.S. grain, and "other" West European countries and "other" Asian countries which decreased 75 percent and 28 percent, respectively.

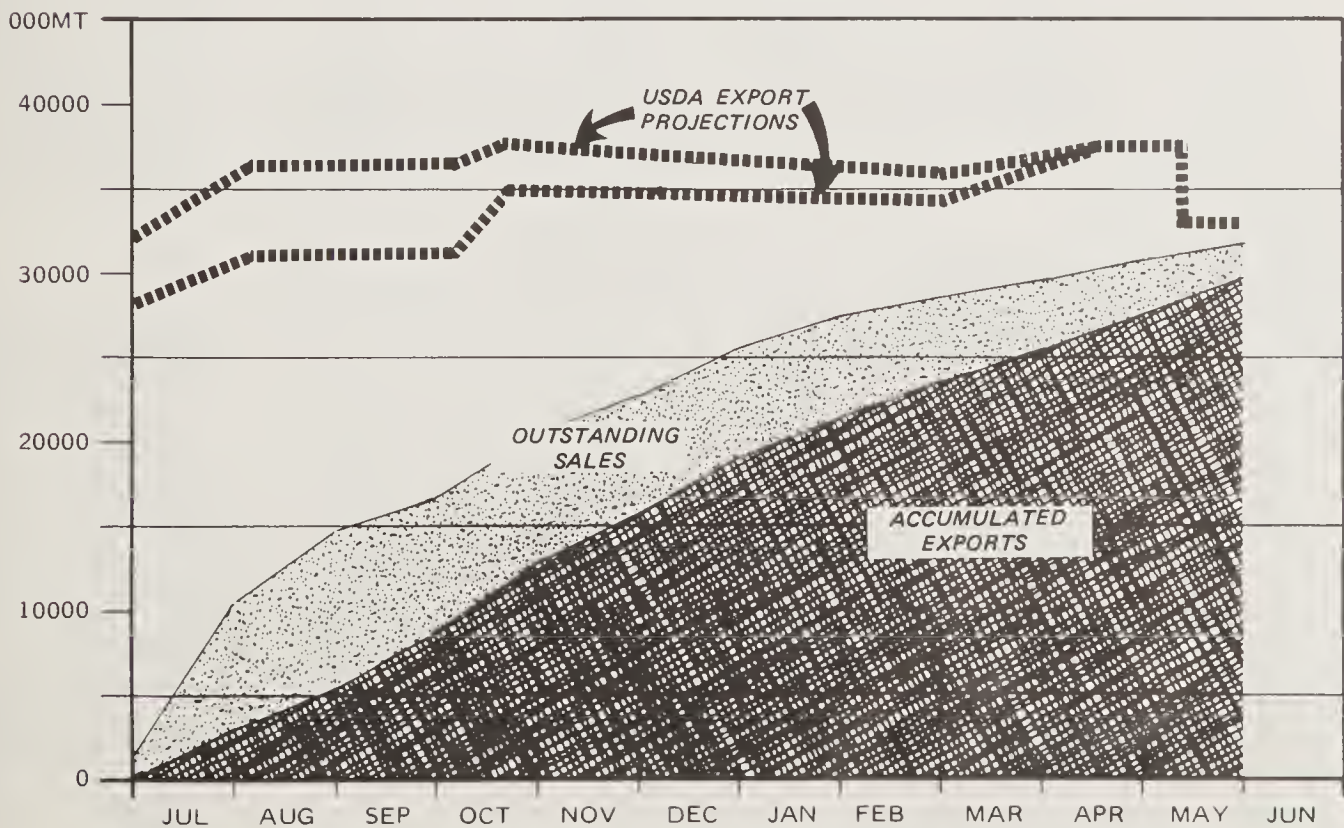

Wet harvest conditions for the 1975, U.S. crop resulted in limited supplies of 12 percent and higher protein wheats in both the Hard Red Winter and Hard Red Spring producing areas, with high premiums prevailing most of the year. The Soviets, who bought most of their U.S. wheat in July, were quick to acquire a large portion of the available Hard Red Winter wheat with 12 percent plus protein. Protein buyers in Western Europe took some Hard Red Spring wheat while reducing their imports of Hard Red Winter wheat. In markets where protein is less of a determinant, such as India, "other" Asian countries and Africa, there was a noticeable shift to Soft Red Winter wheat. Durum exports to East Europe and North America increased due to large supplies and competitive prices.

On June 1, 1976 (when the 1976/1977 marketing year began), a total of just over 2 million metric tons in outstanding sales for wheat of U.S. origin was carried over from the previous marketing year. Previously reported forward sales of 3.7 million metric tons for 1976-77 brought total U.S. origin sales to 5.7 million metric tons. The comparable figure on June 1 a year ago was 8.6 million metric tons. In addition, 460 thousand metric tons of optional origin sales, which included 350 thousand metric tons to the USSR, were carried over.
